

Abdul Hamid Shuvo

Lead Full Stack Software Engineer · TypeScript · Next.js · React · NestJS · Systems at scale · 9+ years at Chaldal (YC S15) · 17+ years in software since 2009

me@suvo.me +880 1711 279909 www.linkedin.com/in/shuv0 github.com/suv0 suvo.me

Dhaka, Bangladesh. Open to remote roles.

SUMMARY

I am Lead Full Stack Software Engineer at AllChrono, where I help build the platform behind a global luxury-watch trading marketplace. I still own products end to end. From 2017 at Chaldal, I worked across mobile web, native shopper apps, Chalao ride sharing, Chalao Driver logistics, and Protocol.

I started freelancing in 2009 and later co founded Dwetech. From 2009 to 2016, we delivered more than 60 projects for clients in the USA, UK, Canada, and Australia. In January 2017, I joined Chaldal (YC S15, about 2,200 staff) when the company had only a minimal desktop site and no production mobile web or native shopper apps. I built the mobile web from zero, rebuilt the desktop experience, and shipped Android and iOS shopper apps as primary engineer. I now lead full-stack engineering at AllChrono.

EXPERIENCE

Lead Full Stack Software Engineer

AllChrono · Dhaka, Bangladesh (remote) · Present

- Leading full-stack engineering at AllChrono, a global luxury-watch trading platform anchored in Saudi Arabia that provides trusted infrastructure for cross-border transactions.
- Own product architecture across the Next.js marketplace, seller, operator, and landing surfaces together with the NestJS platform API, including identity, authentication, and seller-facing workflows.
- Shape technical direction on TypeScript services backed by PostgreSQL and Prisma, with Dockerized delivery across the application and API layers.

CI/CD Docker Mentorship

Senior Software Engineer

Chaldal (YC S15) · Dhaka, Bangladesh · Jan 2017 to 2026

- Joined Chaldal in January 2017 when the platform had a limited desktop experience and no production mobile web or native shopper apps. Built mobile web from zero, modernized desktop, and shipped Android and iOS shopper apps as a primary engineer.
- Built Chalao ride sharing under Chaldal licensing. Shipped the app and led BRTA and government side work, including meetings, documentation, and enlistment.
- Own Chalao Driver for logistics operations. Built and maintain the React Native app used by last mile drivers in production conditions.
- Build and maintain GogoBangla, a merchant fulfillment app for ecommerce and f commerce workflows across picking, warehousing, and shipping.
- Shipped Protocol for over 1,000 internal users, maintained multiple operations apps, and shaped early frontend architecture on Subject and EggShell.

Co-founder & Lead Developer

Dwetech · Bangladesh (remote client delivery) · Jun 2009 to Dec 2016

- Co founded a software company and delivered 60+ projects for clients across the USA, UK, Canada, and Australia.
- Built product and client systems across PHP, JavaScript, CMS ecosystems, integrations, and automation-heavy workflows.
- Built in house SaaS products, including a CRM and mobile credit recharge tools, alongside client delivery. Maintained a 5.0 rating across 63 completed projects on Freelancer.com, including multi year engagements with repeat enterprise clients.

EDUCATION

B.Sc., Computer Science & Engineering
Stamford University Bangladesh · 2008 - 2012
